

EXECUTIVE SUMMARY

On May 24, 2002 the Division for Air Quality received an application from Texas Eastern Transmission Corporation to renew their Title V operating permit for their natural gas compressor station located in Danville, Kentucky. This application was determined to be complete on June 6, 2005. The permitted points are ten compressor engines and three gas turbines.

The issuance of a Title V permit requires a preliminary determination and public notice. This has been done by the Division. An advertisement was placed in the Danville Advocate Messenger on October 6, 2005. The thirty-day comment period has expired with no comments received.

In conclusion, a thorough analysis has been made of all relevant information available which pertains to this application. The Division has concluded that the proposed operation will comply with all air quality regulations and requirements. Therefore, a final determination has been made to issue a proposed permit which will become final upon approval of the EPA.
